

PRINERGY EVO WORKFLOW

Printers of all sizes need a workflow that will help them lower production costs, improve efficiency and maximize their ROI. **Kodak Prinergy Evo Workflow** is built on proven **Prinergy PDF** processing technology and drives an easy, efficient operation. It is a low-cost solution for printers who don't currently need an automated data-driven workflow.

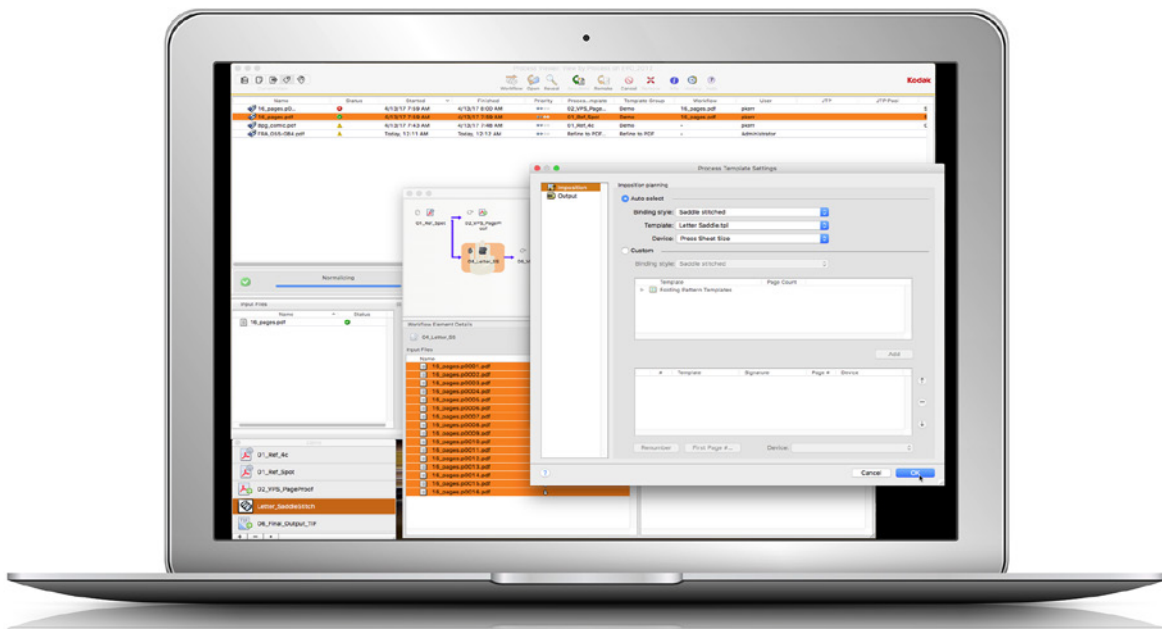

Primary benefits:

- Faster return on investment with low cost of entry
- Reliable high-speed processing and flexible connectivity
- Open integration gives you a variety of output choices
- Delivers best-in-class quality output

A flexible workflow system that helps streamline processes and reduce the costs of production.

Version 8.1

- Easy installation and upgrades get you up and running within minutes with Dongle-less licensing
- New business opportunities to effectively handle modern graphic files with the latest APPE
- Affordable cost of entry with Windows 10 Professional support

With the Process Template Palettes and the Process Viewer you can submit files to **Prinergy Evo Workflow**. You can also track the progress and the status of both running and completed processes.

Kodak Prinergy Evo Workflow

General specifications	
ColorFlow Software	ColorFlow Software Workflow Edition ensures that the right color settings are used and applied at the correct time in the workflow process
Resubmit improvements	Dynamic settings are now stored, making subsequent resubmissions easier
Remake icon	Indicates which processes can be remade
