

TSR-500

Professional Line

Semiautomatic cutting machine

Designed to enable binderies, copy centres and owners of hand-operated binding machines to cut spools of wire for hand insertion. It is also perfect for people who want to enter the business of supplying boxes of cut wire to offices. The mechanical parts are sturdy and simple to operate, following the same principle as all the other Rilecart products.

Semiautomatic cutting machine

The Company reserves itself the right to modify the features of the products shown in this catalogue.

Cutting device.

Computer.

Waste paper extractor (optional).

HOW IT WORKS

After setting the required number of wire loops and cut lengths into the computer, the operator then presses the foot pedal and the wire is automatically fed into position and cut. The unit is easily foot operated. As the operator is packing the previously cut wire, the cutter is processing the next wire length so the cutting cycle is never delayed.

FEATURES

- Uses wires on spools in all diameters and pitches from 3/16" to 1".
- Cuts a minimum of three loops.
- Cut length can be specified in loops, as well as quantities.
- Operated by footswitch or by continuous cycle.
- Unwinder included.
- Optionals: automatic waste paper extractor.

TECHNICAL SPECIFICATIONS

 220/240 VAC single phase 50/60 Hz; 0,75 Kw

 H 350 x D 450 x L 550 mm.

 25 Kg - Weight of the Unwinder: 30 Kg
