LP³⁶⁰

High-Speed Digital Label Die-Cutting Solution

Ultra-high speed
80m/min

Modularization

Stable

Function

- ◆ **Extreme Speed**
Ultra-high speed processing capacity ≤ 80 m/min, can be the benchmark for production efficiency
- ◆ **Unmatched Precision**
Die-cutting accuracy of 0.1mm, ensuring flawless cut products
- ◆ **Flexible and Versatile**
Modular design supports various processing techniques: scoring, punching, engraving, continuous numbering, flexo printing, varnishing, hot stamping, etc.
- ◆ **Stable and Reliable**
Laser with ultra-long lifespan, $\geq 20,000$ hours of worry-free operation
- ◆ **Technologically Advanced**
Combining strengths to highlight advantages, with an imported galvanometer system and our proprietary laser die-cutting control system
- ◆ **Easy to Operate**
Features like automatic deviation correction, automatic rewinding/cutting/slitting, and waste collection with minimal adhesive residue
- ◆ **Application Range**
Paper-based adhesive labels, PET, industrial tapes, and other film materials
Car decals, self-adhesive labels, wine labels, custom-shaped labels, RFID labels
Paper, PET, tape, protective films, and electronic product labels

Materials

Parameters

JWEI reserves the right of final interpretation of the following parameters, subject to change without prior notice.

Model	LP360
Maximum speed	≤ 80 m/min *
Die cutting accuracy	± 0.1 mm
max cutting width	350mm
Die cutting length	no limited
Feed width	350mm
Unwinding diameter	500mm
Winding diameter	500mm
Visual system	4KCCD industrial camera, QR code/barcode automatic switching graphics
Deviation correction system	Automatic edge correction
Working power supply	Three-phase five-wire system 380V 50Hz
Air pressure	>0.4 mpa No water and no oil
Water cooler size	900mm $\times$ 900mm $\times$ 1100mm
Machine power	15kW
Laser power	300W metal RF laser
Water cooler	3kW
Cutting platform	Negative pressure aluminum alloy table
Supporting document	AL, PLT, DXF, DWG, etc
Machine weight	3500kg
Machine Size (W $\times$ L $\times$ H)	1950mm $\times$ 3800mm $\times$ 1850mm

Note: * will be determined based on the specific materials in the actual application scenario.
